

# SMOOTH SAC

canyoneering stuff sack for small diameter release cords

Supplemental Information

## STUFFING THE SMOOTH SAC

Fig. 1

Fig. 2

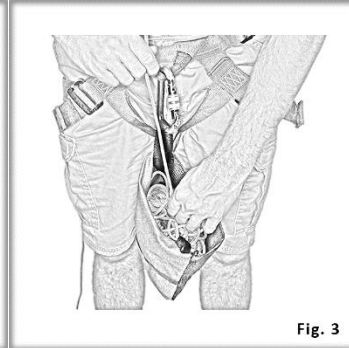

Fig. 3

Hang the Smooth Sac from harness using the inner hand loop (Fig. 1).

Tie the end of release cord to the inner tie in loop (Fig. 2).

Stuff release cord into the Smooth Sac using a hand over hand motion (Fig. 3).

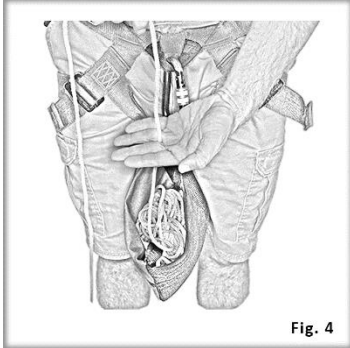

Fig. 4

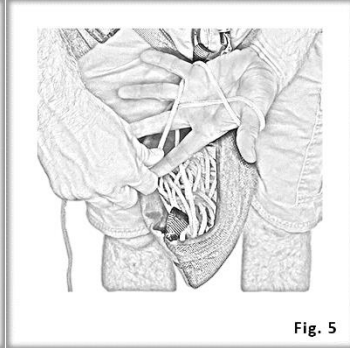

Fig. 5

### Alternate stuffing method

Place hand over the Smooth Sac with palm up and run the release cord between fingers as shown (Fig. 4).

Wrap release cord around little finger and thumb in a figure 8 pattern (Fig. 5).

Continue wrapping release cord until hand is comfortably full (Fig. 6).

Remove release cord from hand and stuff the bundle into Smooth Sac (Fig. 7).

Repeat Fig. 4 through Fig. 7 until the end of the release cord is reached.

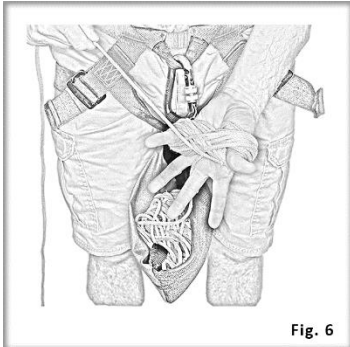

Fig. 6

Fig. 07

Fig. 08

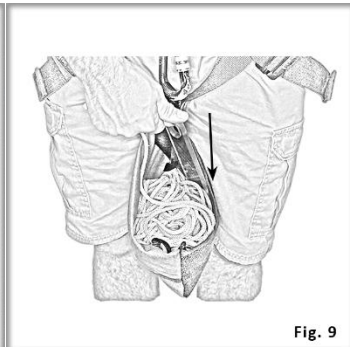

Fig. 9

Tie end of release cord to inner handle (Fig. 8).

If a Smooth Operator is left tied to the end of the release cord, simply stuff the Smooth Operator in the Smooth Sac with the release cord (Fig.9).

When using a size small Smooth Sac, the Smooth Operator should be inserted next to the mesh side to aid in easier opening and closing.
